

# APPLIANCE CLAMP UKK

SAFE – EFFICIENT – RELIABLE

**Clamps for boxed goods** are used for palletless transport of packaged goods

### Carton clamp UKKS

The **UKKS** type is a carton clamp with rigid arms. The clamping arms consist of slim contact plates which are coated with rubber. The compact design allows for narrow standing goods to be clamped. The rigid arms are fixed and cannot be adjusted.

### Appliance clamp UKK-PE

The **UKK-PE** type are appliance clamps with single articulating arms. The contact plate is movably mounted. This design principle offers considerable advantages with regard to the distribution of the clamp force over the entire contact surface. The plate articulation distributes the force from front to rear. This prevents local overloading of the goods while still ensuring secure gripping. This clamp is ideal for electrical appliances to be handled. In addition, this class offers a multitude of options. The clamping arms themselves can be optimally adjusted to the transported goods. If different goods require different clamping forces, the UKK-PE can be easily extended with different pressure selection valves as an option.

### Appliance clamp UKK-PD

The **UKK-PD** type is an appliance clamp with double articulating arms. The gripping surface is additionally separated in the middle, resulting in a front and a rear partial surface. Each of these sections can also move around the vertical axis. The force is optimally distributed to the individual rows and evenly applied to the row itself. The clamp arm offers the best possible adaptation to the transported goods and thus helps to reduce the strain on the goods and to eliminate damage to the packaging as much as possible.

### Appliance clamps UKK-PSE / UKK-PSD

The **UKK-PSE** and **UKK-PSD** types are a combination of rigid and articulating arms. This combines the advantages of a rigid arm with aluminium plate and the advantages of a pendulum arm. These units cannot achieve the even force distribution of a UKK-PE but run more easily into densely stacked goods.

DURWEN APPLIANCE CLAMP TYPE UKK-PE

high-friction  
rubber coating  
as standard

one face

wear strip UKKS

wear strip UKK-PE

protection strip  
as standard

adjustable pressure relief  
valve with pressure gauge

low wear  
profiles

durable rubber coating  
due to edge protections

adjustable plates  
for optimized  
force distribution

bolt-on plates

excellent visibility

## Clamps for boxed goods - surface coatings
